

## *summary*

The research stood up ( the traveling and transporting liberty) on the theory including that the states obligation to respect the general rights and liberties with the specific right that is the travel freedom , and transporting doesn't admeasuring merely is including the laws and constitutions of those States on the fourth right provisions which indicated on the conciding with what is written in the international documents and promises with this right, but with that effect on these obligating ( negative and positive) in the possibility range to go by specific authorities in misusing authorities empowered according to law ,for the regulate exercising this right, or for keeping order of the public system in the moral, health and security way.

Over and above of that what are availability and efficiency of the. judicial control on the constitution of laws and order which it accordance and wrought in administrating the liberties and rights affairs , specially with rights of travel an transporting, as we judicial control on the administration works, specially with that take from dedcisions in the single volition in affairs of the public liberties and rights ( as the rigfhts of travel and transporting) if it those decisions were individuality or regulatory.

Our research proved through applying it,s subjects on the rights of travel and transporting in Iraq in past and at present the truth what was proceeding in this theory whence absence of the constitutional and judical warranties in the past, which lead up to broad abuses

for this right, whereas become unlikelihood, getting like those abuses in new Iraq because having truth guarantees, it's what was conduct us to proffering some recommendations which may describing as the good exploitation to nature of the new political and constitutional system to get high using in the drafting scope of rights and liberties, one of those is right of travel and transporting with its different details.

Significance of research is to statement effecting of the travel and transporting right on another personal, civil, political and economical

rights, if it was not transgressed, and available for it the enough security to face public authorities, specifically executive authority and its administrative system, because it effecting on the political rights, where as requiring its exercising without put bounds and transporting of citizens and prohibit them from that, also not allowing seizure or jailing for anyone without legal proof, that denying from travel and transport, right that meaning disqualify from exercising the political rights as right of electioning right ( electors of electors ) to prohibiting them from go for the elective station , if that was jailing or prohibit made from traveling , also its effecting on economical , commerce , industry, workers and capital transporting rights inside or outside state and among states, and also possession right.

So, whole those rights are nothing when the individual cannot moved to exercising the mentioned liberties and rights as well as referance to effecting those rights to the personal rights, specially the rights of safe feeling with regard what is basis of the travel right

should not have jailing, prohibiting, duress or shackle because those elements are dependent upon the personal safe right.

So, while those rights are nothing when the individual cannot move to exercising the mentioned liberties and rights as well as reference to effecting those rights to the personal rights, especially the rights of safe feeling with regard to what is the basis of the travel right should not have jailing, prohibiting, duress or shackle because those elements are dependent upon the personal safe right.

The faith in importance of the travel and transport right requires from us confirmation of the faces of the constitutional and judicial protection, especially the travel and transport right, than confirmation on the Iraqi situation under two different political and constitutional systems, before and after 2003.

I wish, in this research to be in harmony with the introduction, formations and suggestions which it subscribes to building what is positive, and leave what is negative in the procession of right and liberties in Iraq.
