

(Abstract)

Iraqi legislator adopted in organizing the relationship between the provinces is a regular in the province and the federal authorities (executive, legislative) administrative decentralization and regional system, as a result of political and social conditions, economic and historical etc .. Organization texts of this relationship between the provincial and federal authorities have prevailed under the administrative decentralization regional system upheaval legislatively as mixing legislator between this system and the system of political decentralization federal so given to the provinces is not organized in a region authorities broad powers approaching, in many cases of political decentralization in spite of the adoption of the legislator expressly for the system of administrative decentralization, sometimes we find that the ingredients of the administrative territorial decentralization does not apply to Helms by Shara and therefore Find this obstacles confused in the organization of the relationship between the federal authorities and the provinces with regard to cooperation in light of the administrative management of the relationship with each other as the legislator eased censorship on provinces It is organized in a region by making control over these provinces by the House of Representatives but that did not prevent the legislature in the provincial law of the provinces that are subject to control the executive branch and certain specific cases. Therefore, we investigated the subject ((the relationship between the governorates not organized in a region of the Federal authorities in Iraq)) in two chapters preceded **reference** prelude, Section primer dealt with the general principles of the relationship between the provincial and federal authorities in Iraq is either the first chapter we discussed cooperation between the provincial and federal authorities and the second chapter devoted to the control of the authorities the Federal governorates not organized in a region .
